## TABLE OF CONTENTS

---

<b>Acknowledgements</b>	<b>2</b>
<b>Executive Summary</b>	<b>7</b>
Advantages and Challenges of Focusing on Uranium mine Remediation	7
Limitations of the Study	8
Recommendations to Develop Future Opportunities	8
<b>Introduction</b>	<b>10</b>
1.1 Background	10
1.2 Purpose of the Study	10
<b>Background</b>	<b>12</b>
2.1 History of Uranium Mining in New Mexico	12
2.1.1 Uranium Mining and the Atomic Energy Commission	12
2.1.2 Commercial Mining	12
2.2 Uranium Waste Sites	14
2.2.1 Geography and Ownership	14
2.2.2 Type	16
2.3 Current Status of Cleanup Work	17
2.3.1 Available Funding and Settlements	17
2.3.2 Remediation Completed and Underway	21
2.3.3 Other Cleanup Efforts in Discussion	22
2.4 Uranium Remediation	23
2.4.1 Defining “Cleanup”	23
2.4.2 Potential Scope and Cost is Infinite	24
<b>Economic Impacts</b>	<b>25</b>
3.1 Objective and Scope	25
3.2 Data and Methodology	25
3.2.1 Surface Non-Disposal	28
3.2.2 Surface On-Site Disposal	29
3.2.3 Surface Offsite Disposal	31

3.2.4.	Underground On-Site Disposal	32
3.2.5.	Underground Offsite Disposal	34
3.2.6.	Multipliers	36

---

## Workforce Status & Requirements 38

4.1.	Background	38
4.2.	A Review of Major Occupational Groups Associated with Uranium Mine Cleanup	39
4.2.1.	Construction and Extraction	39
4.2.2.	Architecture and Engineering	41
4.2.3.	Life, Physical, and Social Science	43
4.2.4.	Transportation and Material Moving	45
4.2.5.	Other (including mining, health, office administrative services, etc.)	47
4.3.	Training Programs and Certifications	47
4.3.1.	New Mexico's Training and Educational Programs	47
4.3.2.	OSHA Trainings	49
4.4.	Conclusions	50

---

## Constraints 51

5.1.	Planning and Administration	51
5.1.1.	Informational Barriers	51
5.1.2.	Lack of Process for Identifying Liability and Specifying Action	52
5.1.3.	Land Ownership and Intergovernmental Relations	53
5.2.	Business Challenges	55
5.2.1.	Organizational Capacity	55
5.2.2.	Networking	57
5.2.3.	Insurance and Surety Bonding	57
5.3.	Workforce Challenges	58
5.3.1.	Specialized Certifications and Trainings	58
5.3.2.	Worker Retention and Placement	58
5.3.3.	Job Site Constraints	59
5.3.4.	Coordination Among Universities	59
5.4.	Broader Constraints	60
5.4.1.	Dated and Expensive Remediation Solutions	60
5.4.2.	Lack of Local Context in Remediation Decisions <i>5.4.2.1. Technical and Geographic Expertise</i>	60

<b>Recommendations for State Action</b>	<b>62</b>
6.1. Overall Planning	62
6.1.1. Create a Central Repository for Information	62
6.1.2. Identify and Engage Key Stakeholders	63
6.1.3. Develop a Unified Plan with Stakeholders	63
6.2. Challenges Faced by State Businesses	63
6.2.1. Establish a Specialized Small Business Assistance Center	63
6.2.2. Create Shared Workspace for Businesses	64
6.2.3. Create a Facility to Provide Support or Guarantee for Bonding	64
6.3. Challenges Faced by the State’s Workforce	65
6.3.1. Advance Consistent Safety Certification Training Programs	65
6.3.2. Facilitate Collaboration among Higher Education Institutions	66
6.3.3. Create Opportunities for Worker Placement Locally	66
6.4. Development of Future Opportunities	67
6.4.1. Prioritize Environmental Remediation as a Target Industry	67
6.4.2. Generate Pathways for Greater Innovation	67
6.4.3. Continue Research on the Effects of Unremediated Uranium Mines	68

## List of Tables

Table 3.1. Table of Possible Remediation Scenarios	27
Table 3.2. Total Impact for Surface Mine Non-Disposal, by Industry (per \$1 Million Direct Investment)	29
Table 3.3. Total Impact for Surface Mine On-Site Disposal, by Industry (per \$1 Million Direct Investment)	30
Table 3.4. Total Impact for Surface Mine Offsite Disposal, by Industry	32
Table 3.5. Total Impact for Underground Mine On-Site Disposal, by Industry (per \$1 Million Direct Investment)	33
Table 3.6. Total Impact for Surface Mine Offsite Disposal, by Industry (per \$1 Million Direct Investment)	35
Table 4.1. New Mexico Construction and Extraction Occupational Group Salary and Growth Projection	40
Table 4.2. New Mexico Architecture and Engineering Occupational Group Salary and Growth Projection	42
Table 4.3. New Mexico Life, Physical, and Social Science Occupational Group Salary and Growth Projection	44
Table 4.4. New Mexico Transportation and Material Moving Occupational Group Salary and Growth Projection	46

## List of Figures

Figure 2.1. Uranium Ore Production in New Mexico 1948-2002	12
Figure 2.2. Uranium Ore Price per Pound over Time	13

Figure 2.3. Uranium Mine and Exploratory Drilling in Northwest New Mexico Map	15
Figure 2.4. Approximate Number of Uranium Mine Sites in New Mexico by Type	16
Figure 2.5. Northeast Church Rock Uranium Mine Timeline of Key Events	19
Figure 3.1. Cost Estimates and Invoices Used for the Impact Analysis by Mine Type	27
Figure 3.2. Non-Disposal Impacts of Surface Mine Cleanup (per \$1 Million Direct Investment)	28
Figure 3.3. On-Site Disposal Impacts of Surface Mine Cleanup (per \$1 Million Direct Investment)	30
Figure 3.4. Offsite Disposal Impacts of Surface Mine Cleanup (per \$1 Million Direct Investment)	31
Figure 3.5. On-Site Disposal Impacts of Underground Mine Cleanup (per \$1 Million Direct Investment)	33
Figure 3.6. Offsite Disposal Impacts of Underground Mine Cleanup (per \$1 Million Direct Investment)	34
Figure 3.7. Economic Impact Multipliers for Employment, Labor Income, and Output	36
Figure 5.1. Sources of Government Information Used for the Research Presented in this Report by Agency	52
Figure 5.2. A Small Section of New Mexico's Uranium Mines and Drilling Sites Overlaid on Jurisdictional Boundaries	54

## List of Appendices

Appendix A. Economic Impact	A-1
Appendix B. References	B-1
Appendix C. Contacts	C-1
Appendix D. EPA Cleanup Terms	D-1
Appendix E. Northeast Church Rock Mining Timeline	E-1
Appendix F. Cost Guidance Assumptions	F-1
